

**Our goal - learning from you**

We would like to hold a virtual event focussing on how to communicate well with people living with a Learning Disability

**Are we on the right track?**

We have prepared three discussion documents to outline our proposed work to improve communication.

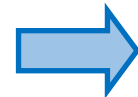

- Project Briefing
- Proposed Road Map
- Draft Leaflet

**Feedback - comments and suggestions**

We invite feedback from organisations supporting people with a Learning Disability and service users, as appropriate.

What will make it work? Who needs to be involved? How can we make the event accessible? We are open to suggestions to how to run the event and appreciate your skills, knowledge and experience in working with this cohort of people.

**Draft road map for developing a model of effective communication with people with a learning disability**

**Reflection**

Collate findings of the event and prepare a report with recommendations.

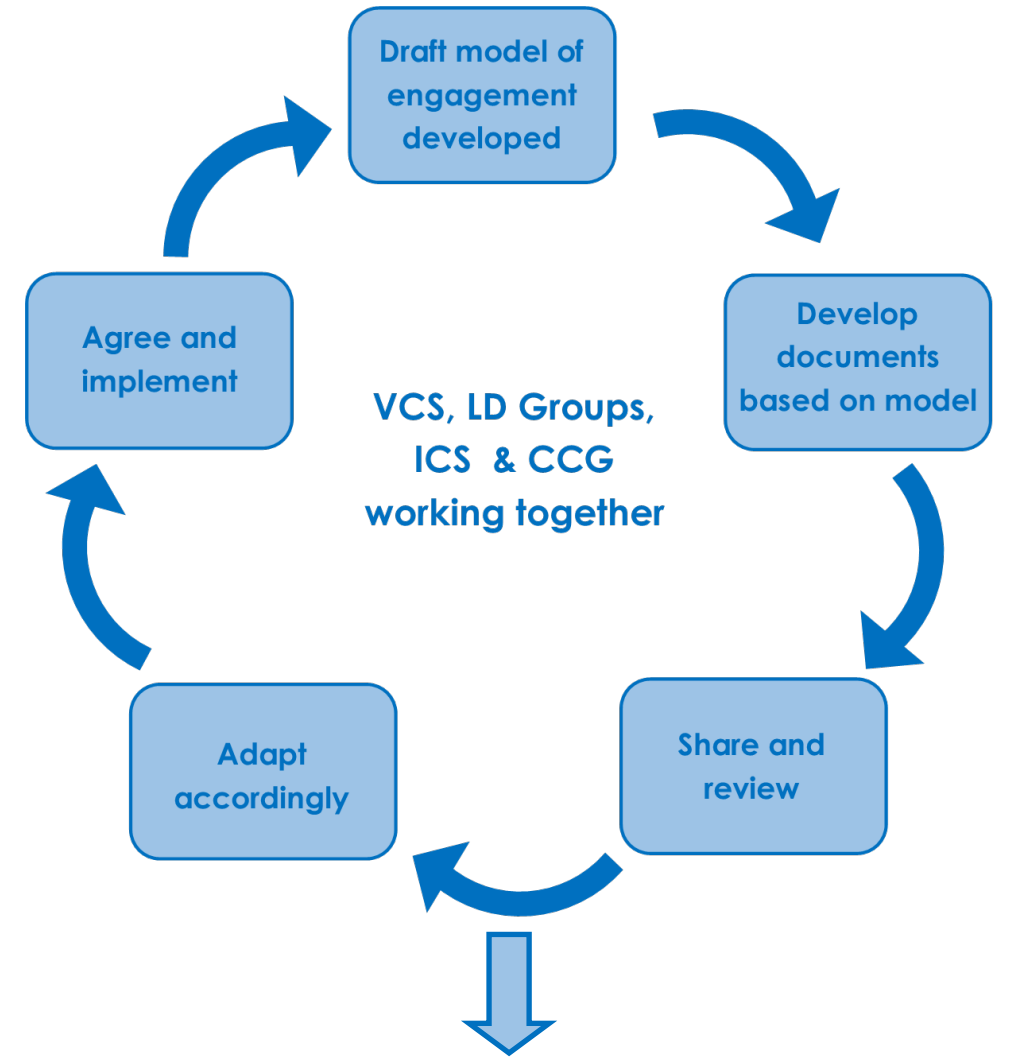

**Delivery of event**

As agreed with everybody who has been involved in the planning stage.

**Co-produce the event**

Taking on-board any feedback and comments to ensure the event is planned appropriately and meets the needs of everyone involved.

**Development**

Development of an appropriate model of communication for people with a Learning Disability. This model to be available to all partners within the ICS for Nottingham and Nottinghamshire.

**Our Aspiration**

This model will be adopted and implemented by all ICS partners so that people with a Learning Disability are; communicated with effectively and enabled to make informed choices in relation to their health and wellbeing. This will ultimately lead to a reduction in health inequalities.
